PROFILE

UX/UI and product designer with experience in consumer-facing digital products. I have owned end-to-end product design initiatives from research to release. My design approach combines user research, systems thinking, and product strategy with hands-on work in usability testing, interaction design, and production-ready UI across product and engineering handoffs. I bring strong grounding in design systems and cross-functional collaboration, and I am expanding my practice into conversational UX and AI-native product experiences.

WORK EXPERIENCE

MadTrip

May 2026 – August 2026

UX/UI Designer, Mumbai

- Designed and built a responsive Shopify storefront for MadTrip's brand launch, including 7 custom sections, PDP and collection page templates accommodating 13 collections, and 5 key customer touchpoints across the site.
- Curated the storefront's design language by analysing 50+ artworks and benchmarking 8 competitors, balancing brand-artist alignment with market differentiation.

Coschool

March 2025 – April 2026

UX/UI Designer, Hyderabad

- Spearheaded end-to-end redesign of the teacher and student platform through usability testing and heuristic evaluation, improving the heuristic evaluation score from 5.5 to 8.5.
- Redesigned the primary learning experience informed by behavioural insights and user flows, driving product adoption and reaching an 80% completion rate of defined learning goals.
- Restructured information architecture and interaction patterns across the student home experience and design system, increasing feature visibility and usage by 72%.
- Increased task success rate by 52% and user retention by 41% through iterative usability testing, resolving friction across key user journeys.
- Designed data visualisation dashboards spanning 88 distinct data points for teacher, parent, and admin apps, surfacing student performance data as actionable insight across three distinct stakeholder roles.
- Drove stakeholder alignment across product, engineering, marketing, and leadership through structured design reviews, prototype reviews, development handoffs, and cross-functional collaboration.

Independent Research & Design Practice

June 2024 – February 2025

Designer, Mumbai

- Authored and published an original research paper in IJCRT (2024), applying user research and behavioural insight methods to a complex urban system.
- Built a social enterprise venture from 0 to 1 as part of Runway Incubator's Social Enterprise track, from initial concept and research through early-stage design, validation, and stakeholder engagement.
- Designed a playable installation for the Museum of Solutions (MuSo), in partnership with Maker's Asylum Goa, teaching simple machines to children, engaging 200+ students over a 2-week interactive exhibit run.

Neo Marche

Oct 2023 – May 2024

Communication Designer, Mumbai

- Owned end-to-end design and daily optimisation of a 5-page sales website centred on service demos, driving a 6x increase in leads and a 55% conversion rate growth within 2 months through continuous iteration.
- Shaped brand language and visual identity across 4 digital channels, maintaining consistency through the brand's growth phase for a fashion retail audience.

FREELANCE PROJECTS

Space118 - UX/UI Designer, Mumbai

Designed an immersive web-based audio-visual experience for the art exhibition 'The Right To Look', contributing to a 2× increase in audience engagement.

Goa Sunsplash - Visual Designer, Goa

Led the design of festival-wide visual communication across print, digital, and environmental touchpoints. Developed cohesive attendee-facing collateral and promotional assets, ensuring a consistent experience across the festival.

SHEISIN - Digital Designer, Mumbai

Designed website merchandising assets, product listings, and digital campaign creatives while supporting post-production workflows, improving product discoverability, maintaining visual consistency during brand launch, and contributing to a cohesive customer experience across digital touchpoints.

Ruskin Bond Collection - Product Editor, Mumbai

Developed merchandise and packaging concepts that translated literary storytelling into sustainable, customer-facing product experiences.
